

EXISTENTIAL THERAPY Training

introduction to existential analysis

3 Day
Seminar

Aug. 18-20, 2017 (9:30am-5:30pm)
Calgary, AB - NW location
facilitated by Existential Analyst
Rochelle Chapman, MA, RCC

**A life led with
inner consent -
commitment,
engagement, and
freedom to choose**

Existential Analysis is rooted in Viktor Frankl's logotherapy and was developed into a comprehensive theory and approach by Dr. Alfred Längle, the president of the International Society for Logotherapy and Existential Analysis - Vienna.

Existential Analysis provides:

Development of the therapist as a person using experiential dialogue

A concrete method for deepening therapy and meaningfully encountering clients and supervisees

A comprehensive theoretical framework for the human being and the treatment of mental health

Concepts such as inner consent, phenomenological presence, motivation, fundamental trust, and existential meaning

Specific treatment approaches for depression, anxiety, grief, couples, self-worth, addiction, personality disorders, etc.

This seminar is for professional development or a prereq to the training program to become an Existential Analyst.
